Update Primary Care Physician

Pay my bill

Find a doctor

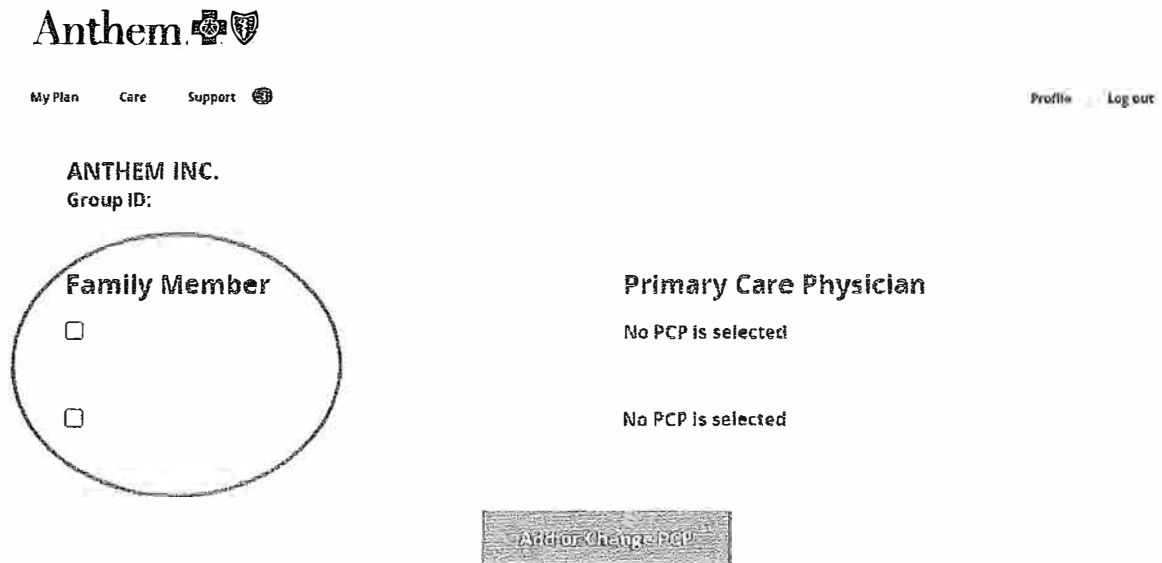

Step 3: You will now see a screen to add, change, or remove your PCP. You can select one or all family members under your plan by clicking on the radio box next to the family member's name.

Add, Change or Remove Your PCP

A Primary Care Physician (PCP) acts as your regular doctor and will coordinate other care you might need. Use this page to choose or change a PCP for each of your family members.

If you recently have submitted a request to change your Primary Care Physician, it will not be visible on the site until the effective date of the change. Your plan below shows members with active medical coverage. Any plans that are pending can't be updated until active.

Step 4: Click the radio box next to the family member(s) for which you would like to select a PCP. Then click on "Add or Change PCP".

Reset Search

Step 7: A screen will come up asking why you are changing your Primary Care Physician. Please select a reason and click "Add or Change PCP".

Please tell us why you added or changed your Primary Care Physician:

null

- Member changed address
- Provider too far
- Provider moved
- Provider terminated with plan
- Open Enrollment
- Dissatisfied with quality of care
- Dissatisfied with the provider
- Dissatisfied with the office staff
- Patient age inappropriate (too young, too old)
- Office wait is too long
- Long wait for referral to specialist
- Never seen/Did not accept assigned provider
- Provider no longer available
- Provider/Office requesting the member to be changed
- Provider not accepting new member at this time
- Provider is deceased
- Member Request
- Provider only treats children over the age of 12
- Other

Cancel

Ask to change PCP

Step 8: You will see a message that your selection has been updated. Please note that the webpage will show the current PCP until the effective date of the change. (Even if the current PCP is that there is no PCP selected).
